## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “*second divider for dividing said filtered output clock by said period control word*” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

2. Claims 1-6 are allowed

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, claim 1 is allowable over prior art of record because the cited reference, Mathe et al. U.S. Patent 5,825,253, discloses in FIG. 2 a similar digital frequency synthesizer including a variable divider 104, a divider controller 120 that can be implemented as a noise shaper, a PLL for filtering out jitter from the output clock. However, FIG. 2 of Mathe et al. invention lacks "a digital loop for generating said period control word in response to said error" as claimed by Applicant.

3. Claims 7-12 are allowed

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 7, claim 7 is allowable over prior art of record on the same ground as for claim 1. FIG. 2 of Mathe et al. invention further lacks "a second divider for dividing said filtered output clock by said period control word so as to generate one divided output clock" as claimed by Applicant.

**Conclusion**

4. This application is in condition for allowance except for the following formal matters:

The Drawings do not show the claimed subject matter as recited in the Drawings objection.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Keaveney et al. U.S. Patent 6,927,716 B2 discloses "Variable Modulus Interpolator, And A Variable Frequency Synthesizer Incorporating The Variable Modulus Interpolator".

Ke U.S. Patent 6,700,446 B2 discloses "Phase-Locked Loop Frequency Synthesizer Including Controllable Synchronous Frequency Dividers Controlled By A Common Frequency Dividing Control Signal".

Filiol et al. U.S. Patent 6,515,553 B1 discloses "Delta-sigma Based Dual-port Modulation Scheme and Calibration Techniques For Similar Modulation Schemes".

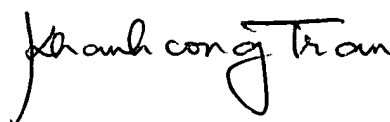

Huff et al. U.S. Patent 6,961,400 B1 discloses "Automatic Frequency Correction Apparatus And Method Of Operation".
